Solutions for agricultural, commercial and industrial building needs

LIBERTY BUILDING SYSTEMS – EVERYDAY BUILDING SOLUTIONS

★ Manufacturing Facilities

Liberty Building Systems® offers pre-engineered steel building systems that provide a unique combination of quality, service, performance and affordability. With a wide selection of framing options, building components and accessories available, Liberty provides a complete building solution to business owners—no matter what the intended end use is for their building.

UNMATCHED VALUE

Liberty buildings are designed to add value without adding excessive costs. An extensive selection of products, including a full line of building components, is available for customers who are looking for quality at an economical price. All Liberty buildings feature acrylic-coated G30 galvanized secondary framing at no additional cost. Liberty also offers a standing-seam roof system for superior protection from the elements. More color options than ever round out the Liberty commitment to providing unmatched value.

Liberty Building Systems provides quality buildings at an affordable price. Visit www.LibertyBuildings.com to learn more.

AVAILABLE THROUGH BUTLER AND YOUR LOCAL BUTLER BUILDER.®

Liberty buildings are offered through Butler Manufacturing™ and the Butler Builder network of more than 1,200 construction professionals. As the leading provider of systems construction solutions, Butler has a national manufacturing footprint that shortens lead times and reduces shipping costs. And Butler Builders are local building contractors who offer years of experience and trusted reputations in serving their communities.

EXTENSIVE WARRANTY SUPPORT

All Liberty building products are tested to meet or exceed the highest building standards. Extensive warranty support speaks to the long-lasting performance and durability they offer. Liberty roof and wall panels featuring a Kynar® finish come with a 25-year finish warranty.

LIBERTY BUILDING APPLICATIONS

Each Liberty building is engineered and manufactured to meet local building codes, and you can be confident it will provide years of low-maintenance ownership. The possibilities range from simple to complex structures. Several nationally recognized companies rely on Liberty to meet their construction needs. Whether your needs are complex or basic, nationwide or local, a Liberty building system can enhance your professional image.

AGRICULTURAL / FARM BUILDINGS

Hundreds of satisfied farmers have built cost-effective pre-engineered Liberty buildings. From elaborate dairy and beef barns to roof-only structures, a Liberty building can be equipped to support your entire agricultural operation. You can even choose a multiuse facility for your specific application to maximize your space and budget. Durable Liberty steel buildings are not susceptible to mold and termite infestation, as found with wood frame buildings.

COMMUNITY BUILDINGS

Liberty community buildings are competitively priced, attractive, low-maintenance solutions for gymnasiums, fire departments, community park shelters and more. You can choose a building solution uniquely tailored to your specific community building needs.

RETAIL / OFFICE BUILDINGS

Commercial building solutions from Liberty can be specified to meet almost any project requirement. You can incorporate not only metal wall panels into your facility, but also brick, block, stucco and veneer. In many instances, Liberty buildings may also have features such as parapets and canopies.

WAREHOUSE / DISTRIBUTION BUILDINGS

Whether you are expanding your existing warehouse/distribution facility or need a new building, a Liberty building can meet your desired requirements. From a trucking terminal with multiple overhead door bays to product storage space, Liberty has an efficient and economical building solution. A variety of accessories and framing options is also available to accommodate your interior space needs. Additionally, you can choose from an extensive selection of paint colors to create the perfect image for your company.

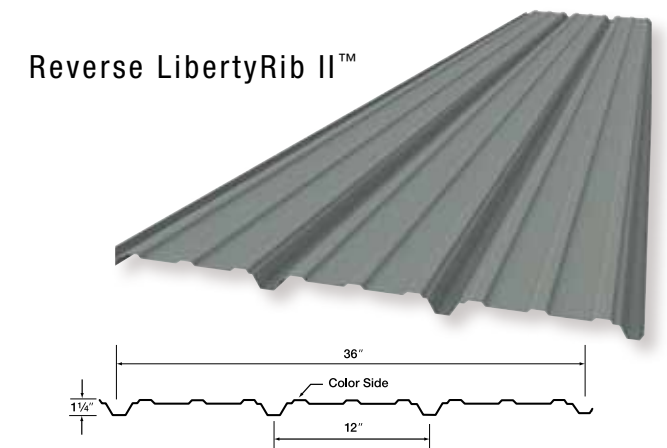

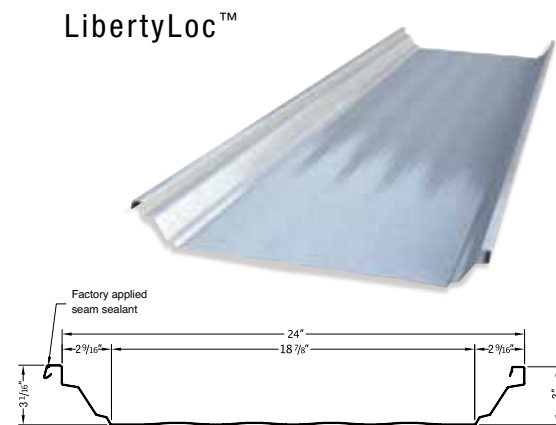

SELF-STORAGE BUILDINGS

Liberty offers a complete line of attractive, secure, cost-efficient and easy-to-erect self-storage building systems. From basic single-story facilities to complex climate-controlled multistory buildings, a Liberty building is the ideal solution. Each Liberty product is designed to meet the highest industry standards, and upgrades are available to create a unique appearance. Whichever solution you choose, you're sure to receive a solid return on your investment.

SUPERIOR PAINT FINISHES

All Liberty buildings feature high-quality paint systems designed to provide long-term performance and protection. Each coating is formulated with thoroughly researched and field-proven primers and resins to meet your standards and performance requirements.

The Liberty paint system features a Kynar® resin-based metal coating with polyvinylidene fluoride for superior, long-lasting performance. It is resistant to chalking, fading and chemicals that can leave a finish looking drab and dated.

STRUCTURAL FRAMING OPTIONS

You can choose from a wide range of Liberty framing options to facilitate the end use and functionality of your building. Liberty structural systems can accommodate large areas of uninterrupted space to maximize productivity and workflow within your facility. From clearspan to modular systems, Liberty structural systems allow almost total flexibility in the height, width and roof slope of your building.
