

Liberty FreedomRib II™ Panel

RIGHT FOR SO MANY REASONS®

Liberty's FreedomRib II™ is a lightweight interior wall panel that is more cost-effective than other masonry alternatives. The panel is designed to be used as an attractive interior liner and partition panel. For large and small projects that need a lightweight, economical solution, FreedomRib II is the perfect option.

AN ECONOMICAL COMPONENT OPTION

FreedomRib II is a lightweight, 28-gauge panel, which can be a more economical solution for liner and partition needs. Panels are available in lengths up to 41' and cover 36". The long length and broad coverage of the FreedomRib II panel minimizes the need for endlaps and sidelaps, which increases the speed and ease of installation as well as enhances your wall's integrity. Self-drilling fasteners help to simplify the installation process. FreedomRib II can accommodate up to 6" of fiberglass blanket insulation for high levels of energy efficiency. The panels are offered with a white silicon polyester finish on the front and a gray primer coating on the back.

Substructure

- None required.

Coverage

- Each panel has coverage of 36" with 1³/₁₆" rib height.

Length

- Minimum panel length is 3'-0"
- Maximum recommended panel length is 41'-0"
- Longer panels require additional consideration in packaging, shipping and erection.

Availability

- 28-gauge interior liner panel

Applications

- Interior liner and partition panel

Fastening System

- Direct fasten (exposed)

Material

- 28-gauge zinc-coated steel

Finishes

- Smooth white silicon polyester finish on the front of the panel and gray primer coating on the back

Features

- Economical
- Easy installation
- Lengths up to 41'
- 36" Coverage
- Lightweight

All panels formed from light gauge metal may exhibit waviness, also known as "oil canning," commonly occurring in, but not restricted to, flat portions of a panel. This inherent characteristic is not a defect of material and is not cause for rejection.
